

PRAVEEN Y

LEAD FULL STACK ENGINEER

Kallakurichi, Tamil Nadu, India • +91 96268 30829 • yonaspraveen@gmail.com • [linkedin.com/in/praveen-y](https://www.linkedin.com/in/praveen-y)

PROFESSIONAL SUMMARY

Results-driven Full Stack Engineer with 5.5+ years of experience designing, building, and leading delivery of scalable web applications across Real Estate, Retail Analytics, and Healthcare Data Management. Proven record of measurable performance impact, including a 50% improvement in application response times through MongoDB query optimization and indexing redesign. Deep hands-on expertise in Angular, Node.js, and MongoDB, paired with practical experience in AWS cloud infrastructure, CI/CD automation, and RESTful API architecture. Experienced people leader who mentors engineers, enforces code quality through structured reviews, and translates business requirements into secure, production-grade technical solutions.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript

Frontend: Angular 18+

Backend: Node.js 22+, RESTful API Design

Databases: MongoDB, MSSQL, PostgreSQL

Cloud & Infrastructure: AWS (EC2, S3, Amplify), Automated Deployments

DevOps: CI/CD Pipelines

Version Control & Collaboration: Git, Bitbucket, GitHub, Jira

PROFESSIONAL EXPERIENCE

Lead Engineer — Adamsbridge

2023 — Present | Real Estate Sourcing & Healthcare Data Management platforms

Key Achievements

- Re-architected MongoDB query logic and indexing strategy, boosting overall application response speed by 50% and materially improving user experience.
- Led migration of a legacy .NET application's data layer to MongoDB, together with a full MSSQL-to-MongoDB database migration, modernizing the platform's data architecture with minimal downtime.
- Integrated a microservices-based architecture into the platform, improving modularity, scalability, and independent deployability of core services.

Core Responsibilities

- Led frontend and backend engineering teams end-to-end, ensuring seamless integration and on-time delivery of platform features.
- Architected scalable, secure application solutions for real estate sourcing and healthcare data platforms.
- Partnered with business stakeholders to translate requirements into technical designs and delivery plans.
- Mentored engineers and enforced coding standards through structured, recurring code reviews.
- Diagnosed and resolved system performance issues to improve reliability and uptime.
- Designed RESTful APIs and integrated third-party services for cross-system data exchange.
- Managed source control strategy and release pipelines using Git and Bitbucket.
- Enforced data security, privacy, and compliance standards across all application modules.
- Collaborated with UI/UX teams to ship responsive, user-centric interfaces.
- Drove continuous improvement by evaluating and adopting new tools and technologies.

Software Developer — Tango Eye

2022 — 2023 | AI-driven real-time retail analytics platform

- Built and maintained scalable, reliable software modules supporting real-time analytics.
- Collaborated cross-functionally with UI/UX, QA, DevOps, and Product teams to define and ship features.

- Wrote clean, well-documented, maintainable code following established engineering best practices.
- Participated in peer code reviews, contributing feedback that improved code quality and consistency.
- Debugged and upgraded existing systems, improving performance and system stability.
- Implemented RESTful APIs and integrated backend services with frontend frameworks.

Trainee Programmer — Analytic Brains Technology Pvt. Ltd.

2021 — 2022 | Chennai | Projects: Customer 360, Valurite, Degradar

- Contributed to design, coding, testing, and debugging across three production applications (Customer 360, Valurite, Degradar) under senior developer guidance.
- Learned and applied core programming and software engineering concepts in a live production environment.
- Wrote clean, well-documented code in line with company coding standards.

EDUCATION

Master of Computer Application — IGNOU, 71% (2021 – 2023)

Bachelor of Computer Application — Thiruvalluvar University, 65% (2017 – 2020)
