PROFESSIONAL SUMMARY

Results-driven Full Stack Engineer with 5.5+ years of experience designing, building, and leading delivery of scalable web applications across Real Estate, Retail Analytics, and Healthcare Data Management. Proven record of measurable performance impact, including a 50% improvement in application response times through MongoDB query optimization and indexing redesign. Deep hands-on expertise in Angular, Node.js, and MongoDB, paired with practical experience in AWS cloud infrastructure, CI/CD automation, and RESTful API architecture. Experienced people leader who mentors engineers, enforces code quality through structured reviews, and translates business requirements into secure, production-grade technical solutions.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript

Frontend: Angular 18+, HTML5, CSS3, Responsive UI Design

Backend: Node.js 22+, Express.js, RESTful API Design, Microservices Architecture

Security: JWT Authentication, Role-Based Access Control (RBAC)

Databases: MongoDB, MSSQL, PostgreSQL

Cloud & Infrastructure: AWS (EC2, S3, Amplify), Automated Deployments

DevOps: CI/CD Pipelines, Git, Bitbucket, GitHub

Collaboration & Tools: Jira, Agile/Scrum, Code Reviews, Technical Mentoring

PROFESSIONAL EXPERIENCE

Lead Engineer — Adamsbridge

2023 – Present

Real Estate Sourcing & Healthcare Data Management platforms

Key Achievements

- Re-architected MongoDB query logic and indexing strategy, improving application response speed by 50%.
- Migrated legacy .NET application data layer to MongoDB and executed full MSSQL-to-MongoDB database migration of nearly 5 years of data across 60+ collections, completing the 2-month migration with zero downtime.
- Implemented microservices architecture, improving modularity, scalability, and independent deployability of core services.
- Built JWT-based authentication and role-based access control (RBAC) to secure API access across platform modules.

Core Responsibilities

- Led a cross-functional team of 4 engineers across frontend and backend, ensuring seamless integration and on-time feature delivery.
- Translated business requirements into technical designs and delivery plans in partnership with stakeholders.
- Mentored engineers and enforced coding standards through structured, recurring code reviews.
- Designed RESTful APIs using Node.js and Express.js, integrating third-party services for cross-system data exchange.
- Managed source control strategy and release pipelines using Git and Bitbucket.
- Enforced data security, privacy, and compliance standards across application modules.
- Collaborated with UI/UX teams to deliver responsive, user-centric interfaces.

Software Developer — Tango Eye

2022 – 2023

AI-driven real-time retail analytics platform

- Built and maintained scalable, reliable software modules powering real-time analytics for 2,000+ retail stores.
- Collaborated cross-functionally with UI/UX, QA, DevOps, and Product teams to define and ship features.
- Wrote clean, well-documented, maintainable code following established engineering best practices.

- Participated in peer code reviews, improving code quality and consistency.
- Debugged and upgraded existing systems, improving performance and stability.
- Implemented RESTful APIs and integrated backend services with frontend frameworks.

Trainee Programmer — Analytic Brains Technology Pvt. Ltd.

2021 – 2022

Chennai | Projects: Customer 360, Valurite, Degrader

- Contributed to design, coding, testing, and debugging across three production applications (Customer 360, Valurite, Degrader) under senior developer guidance.
- Applied core programming and software engineering concepts in a live production environment.
- Wrote clean, well-documented code aligned with company coding standards.

EDUCATION

Master of Computer Application — IGNOU, 71% (2021 – 2023)

Bachelor of Computer Application — Thiruvalluvar University, 65% (2017 – 2020)
